

LabWing's main objective is to facilitate day-to-day laboratory business with innovative, web-based software solutions designed and developed on the basis of our through hands-on experience in the lab environment. One of the principal considerations is to streamline and harmonize various data flows into one efficient and transparent model, enabling labs to service their customers with top quality test results, in the fastest, most accurate and most cost-effective manner possible.

THE CREST OF E-LAB SERVICES

WWW.LABWING.COM

The growth of the installed base of our Labs -of- Time™ web applications makes that we are looking for enthusiastic employees. To reinforce our development team LabWing wants to come into contact with a

Web/Graphic designer (m/v)

Innovative marketing concepts for the laboratory sector

(analytical knowledge, creativity and a good sense of humour are a must.)

Your job involves;

- Designing new websites for our clients
- The development and design of several data carriers (electronically and printed matters) for LabWing.
- Give a creative and conceptual support in relation to the production of various marketing instruments for our costumers.
- Contribute to the realization of user friendly, intuitive GUIs for our web and software applications.
- Managing the (graphical) content of the existing websites.

Who are we looking for:

An intelligent, creative, optimistic and hard worker who primarily will be responsible for the design of the websites and web-based applications developed by LabWing. Besides this he/she will support the other members of the design team with the development of other creative instruments (brochures, adds and fair stands) for the benefit of our own marketing or the

marketing of our costumers.

Your profile measures as well the following demands:

- A relevant bachelor degree, preferably multi media design
- Knowledge and experience with HTML, Javascript, CSS and Flash
- Good practical knowledge of design programs as Photoshop, Illustrator, Dreamweaver and/or InDesign.
- Knowledge of ASP.Net and MS-SQL is a plus
- Work experience in a similar position, preferably as web designer or graphic designer.
- Affinity with B2B communication and in particular the laboratory sector
- Accuracy and a good sense for details and language in your work.
- Being fluent in Dutch and English, preferably also knowledge of the French and German language

What we offer you:

- A challenging career in the rapidly developing design studio of LabWing.
- Large amount of independence.
- Working in a particular varied, stimulating and friendly ambiance with ditto colleagues
- Good salary scale.
